

Creststreet Energy Opportunities Fund

November 2009 Newsletter

Net Asset Value Per Share

November 30, 2009:

Series A: \$13.4271
Series F: \$13.5246
Series 2009: \$13.3666

Fund Description

Creststreet Energy Opportunities Fund (The "Fund" or "CEOF") seeks to provide shareholders with long-term capital growth by employing fundamental securities selection by taking both long and short investment positions in equity, debt and derivative securities and through strategic trading. The Fund's portfolio will consist primarily of securities of issuers engaged in the global, albeit primarily North American, energy sector.

Fund Commentary

Creststreet Energy Opportunities Fund (the "Fund") was down 4.0 percent for the month of November 2009 compared to the Creststreet Custom Index, which was up 0.2 percent for the month.

Outlook

Following the moderate correction experienced in October, North American equity markets continued on their ascent in November, with the TSX rising 4.9%, the S&P 5.7%, and the Dow 6.5% for the month.

This broad market appreciation occurred as data releases demonstrated that, although the economy has stabilized as a result of unprecedented monetary and fiscal stimulus, any recovery will likely be weak with low to moderate growth, with a significant risk of a double-dip recession, especially if monetary and fiscal stimulus is withdrawn too quickly.

The continued appreciation of the stock market, despite data indicating an economic environment that will be unfavourable for corporate profit growth, shows that market sentiment has become increasingly disconnected from fundamentals. Indeed, the most positive piece of economic data we've seen in the past 6 months was the US employment report released in early December. This release was far better than the street's consensus expectations and showed that job losses had fallen to their lowest level since December 2007, providing the first legitimate indicator that the employment level was stabilizing and that there might be greater hope for a sustainable recovery than previously thought. Notably, despite this positive news, the broader markets have traded down since this release.

Commodities Review

NYMEX crude oil closed the month of November at US\$77.28, an increase of 0.4 percent month-over-month. The price of oil remains range-bound as market continues strike a balance between the current supply overhang in the form of elevated global petroleum inventories with future expectations for a period of renewed tightness in supply.

NYMEX natural gas prices closed the month at US\$4.85 per million British thermal units (mmbtu), which represents a decline of 3.9% from the previous month. Although we believe it is only a matter of time for before the supply response from falling rig counts to start to impact natural gas prices, we expect that soft natural gas prices will persist well into 2010 before natural gas storage levels rebalance and natural gas prices improve.

Fund Performance and Strategy

During the month of November, the Fund maintained its exposure to a number of junior and intermediate oil-weighted producers with significant growth prospects both domestically and internationally. We continue to see enthusiasm from the markets with respect to oil producers and we believe that funds will continue to flow into the best companies driving valuations higher. We also continue to remain cautious with respect to investing in natural gas producers in the near-term, as natural gas inventory storage is now at record levels and we have only seen a limited supply response to the rig count decline that began a year ago. We have limited our exposure to those names with the lowest cost projects that will generate material growth over time while also maintaining short positions in those companies with high cost structures and too much financial leverage.

The Fund also continues to hold a number of private investments. These investments, which are principally oil sands developers, have been highly successful investments for the Fund. In accordance with its private investment valuation policy, the Fund marks these investments to market based on third party transactions. Recently we have seen increased activity in the market for these securities as well as a corresponding up-tick in valuations. In particular, the Fund's largest position is in Athabasca Oil Sands Corporation. Athabasca recently announced that PetroChina intends on acquiring a 60% interest in its two most advanced oil sands development projects for \$1.9 billion. The value of Athabasca shares have appreciated significantly in private sale transactions that have occurred since this announcement; however, we continue to believe that the net realizable value of these investments could be substantially higher as oil prices recover and recommend that investors retain their investment in the Fund at these levels.

Use of Benchmarks: The Creststreet Custom Index is comprised of 50 widely-followed conventional North American listed energy exploration and development companies. The Creststreet Custom Index is used to provide investors with a relevant benchmark to the Fund. The Index is reset to an equal-value weight on a monthly basis. The S&P/TSX Capped Energy Index is comprised of shares of Canadian companies involved in exploration and/or production of energy resources and is designed to track the performance of the entire energy sector and is used as a benchmark to show how the Fund is performing in relation to the Canadian conventional energy resource sector on a relative basis. The S&P/TSX Composite Index covers approximately 95% of the Canadian-based Toronto Stock Exchange-listed companies and is designed to track the performance of the Canadian equities market as a whole and is used as a benchmark to show how the Fund is performing in relation to the broader Canadian equity market on a relative basis.

About Creststreet

Creststreet is a performance-driven investment management firm focused exclusively on the energy sector. Founded in 2000, Our mission is to achieve **excellence in energy investing** through strong and consistent investment performance across all of our energy investment products for our Canadian and international institutional and high net worth investors.
